

MIRG

The Online Database Of Municipal Financial Data

MIRG is an online database that has financial data from municipalities across the United States. This is the only database of its kind. It allows a user to compare financial data from one municipality to another. This can be used for budgeting, legislation, borrowing, cost comparisons and much more.

MIRG, THE SOURCE OF DATA FOR DECISION MAKERS

MIRG is an online database that has financial data from municipalities across the United States. This is the only database of its kind. It allows a user to compare financial data from one municipality to another. This can be used for budgeting, legislation, borrowing, cost comparisons and much more.

WHO BENEFITS FROM MIRG

City Governments, Economic Developers, and Consultants will benefit from this powerful tool for analysis. MIRG allows you to compare municipalities of similar population, and budget size with a target community. Imagine what having this data would do to the decision making process for government, economic development, investing, site selection and more.

SUBSCRIPTION OPTION

Users can subscribe to the MIRG database annually and be able to run reports as needed to draw on the data that you need. Subscription rates vary based on various factors like population, or size of firm. Contact GSG Municipal Group for a subscription price.

ONE OFF REPORTS

One off reports can be run for a fee as well. The fees for these reports vary as well, visit the website to learn more about fees and options.

CUSTOM REPORTS

You can even contract with us to create a custom report using custom data that is not currently available on the MIRG database. GSG Municipal Group can do primary research on any data point that your municipality is seeking to understand or compare to other communities.

MIRG gives you tools to get things done

Change the way municipal governments share and understand data

Help citizens understand how and why their governments spend money
